Her professional experience began in the Cartography Department of the Hydrographic and Oceanographic Service of the Chilean Navy (1993 - 1999), where she served as a cartographic draftsman preparing conventional and digital navigation charts and thereafter participated in training on the preparation of electronic nautical charts at Nautical Data International, St. John's, Canada. Then she joined the Desarrollo Marítimo consulting firm (1999-2006), where she participated on projects for the preparation of aquaculture concession and bathymetric maps. Later she joined the consultant firm Borde Costero (2006 - 2008), where she prepared maps of marine concessions and participated in that same period in a Geomatics postgraduate degree program at the University of Santiago.

She currently works at BENTOS, where she participates on a variety of projects in Oceanography, Geophysics, Cartography, Bathymetry and Environmental Studies.
