

Roxana Rodríguez Dupré

Oceanographer
roxana@bentos.cl

Her professional experience started in 2009 with professional practices during Oceanographic studies. Since then, she has been developing her career as research assistant in Ocean Data Management and Process as Programming, mainly at the University of Concepción where she is developing her Thesis under the frame of the Science and Technology Research program “SACC: An International Consortium for the Study of Oceanic Related Global and Climate Changes in South America”, program led by Inter American Institute for Global Change Research (IAI). In this frame her research areas consist in “Sub-mesoscale structures in the ocean off Central Chile: A study using ocean gliders”.

During 2012, she joined BENTOS to work in the oceanographic and environmental consultancy area.
